ADVANCED EDITORIAL ASSISTANT

Current writing tools mainly focus on **grammar and spelling**, but they do not provide the deeper level of analysis required for **professional editorial revision**. Writers and editors still lack an accessible tool that can **assess style, clarity, consistency, tone, repetition, and overall textual quality** directly during the writing process.

This creates a gap between automated proofreading and the kind of feedback a professional editor would provide.

ADVANCED EDITORIAL ASSISTANT

Example: A writer produces the following passage:

“The meeting was extremely important for all the people involved. It was a very significant moment for the team, because many important decisions were made during that meeting. In a way, the meeting represented a crucial turning point for the future development of the project.”

Example: A writer produces the following passage:

*“The **meeting** was extremely **important** for all the people involved. It was a very significant moment for the team, because many **important** decisions were made during that **meeting**. In a way, the **meeting** represented a crucial turning point for the future development of the project.”*

This passage is grammatically correct, but an editor would notice:

lexical repetition

TEST AND EXTEND THE DISASSEMBLY FLOW DIAGRAM BUILDER

Create
(Dis)assembly
Graph

Store them

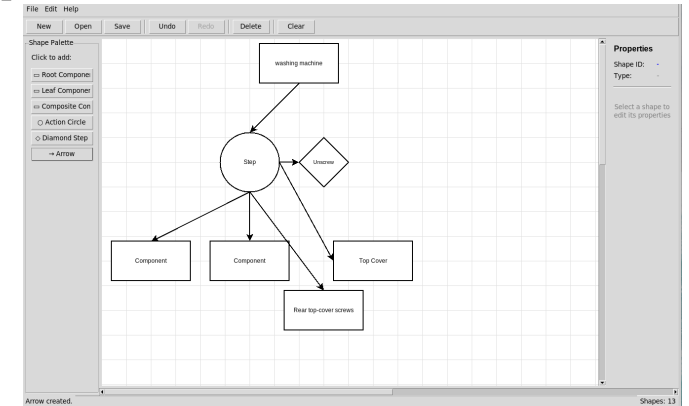

Export them

TEST AND EXTEND THE DISASSEMBLY FLOW DIAGRAM BUILDER

Reverse Engineering the system by creating:

- 1) Urs
- 2) DRS
- 3) Comments
- 4) Testing
- 5) Manuals

Create a tools that reads such Diagrams and create a «wizard» that help the disassembly technician.
